AN OVERVIEW OF THE SYSTEM ELEMENTS

Composite long components tray

The long components tray allows you to transport longer items in the vehicle without any problem.

Sortimo S-BOXX

Sortimo's S-BOXXes are available in four heights, two widths and three depths. They are the ideal container for small components, spare parts or screws and can be securely locked on the shelf. You can pull the drawer out for easy access to all parts.

Sortimo i-BOXX

The i-BOXXes from Sortimo are clever little storage solutions that can be used on their own or as part of the LS-BOXX. They are available in two heights and can be fitted with Inset boxes.

Sortimo Accessories

Original accessories from Sortimo are practical supplementary products for all trades and industries. From the cable holder to the cable hook – Sortimo will fulfill your requirements.

Racks and trays

Up to the last corner, the space in your vehicle can be utilised. Tools and spare parts can be neatly arranged in the racks and trays of Globelyst.

Floor front

Floor fronts provide for order, visual cover and safety in the vehicle.

i-BOXX Adaptor plate

Your i-BOXX is securely locked in place during transport with the aid of the i-BOXX holder. The holder can be screwed to the perforated side panel or to the vehicle itself.

Case clamp

Secures tool and machine cases and can be positioned in no time.

Shutter

With the shutter made out of hollow-chamber profiles, load safety and visual cover takes only one movement. The optional lock provides additional protection against unauthorized access.

MultiSlide

The MultiSlide allows an easy handling of all cases and BOXXes. With the full-extension slide the lids can be opened completely and small parts and tools can be accessed quickly.

ProSafe

The load safety system is integrated into the poles and traverses of the van racking solution.

Safety and protective floors

The basis for your van racking system is the safety or protective floor. You can choose between a variety of floors. The floors are cut to size for different vehicle models, offer integrated lashing possibilities and protect the vehicle floor from damage.

Sortimo L-BOXX and LS-BOXX

Mobile plastic boxes with a wide variety of possible partitions, available in five heights. L-BOXXes can be quickly click-joined with each other and transported as one.

Sortimo T-BOXX

Thanks to the practical plastic case with the transparent lid you can see right away what is in the BOXX. The T-BOXX can be safely stored in the vehicle equipment.

Sortimo M-BOXX

A large mobile box with handle, also available with a lid. The M-BOXX locks in the system and can also be used as a drawer.

Metal case

The original case is available in many different variants. The case is on rails and can be pulled out completely.

Drawers

The new drawers with their user-friendly handles made from impact-resistant plastic are fully extendable and can be loaded with up to 80 kg. They are available in four different widths and heights.

Workbenches

Sortimo workbenches turn your van into a mobile workshop. Both, folding and extendable workbenches are available and can be supplemented with a rotating vice plate and a vice.
